

Genesis™ Distance Driver

CHING® Genesis™ driver is a very fast guaranteed go-to driver for Professional Level competitors. A pure, high caliber, 22mm rim-width and five shallow Excelerators™ (thumb-pods) provide exceptional speed and delivery. Rated at a full point above ↑ USG™ 'stable', this model is bank off the shelf and can be experienced into a money workhorse.; ie if you're a strong player it's extremely reliable for distance with return at flight's end, and you can bet on it over time as it wears in.

Velocity™ Fairway Driver

CHING® VELOCITY™ is the absolute best choice for control on long line drives and downwind distance. A smooth release with even tempo yields reliable stable flights, with plenty of opportunity for big-arms to hold the hyzer or easily work this disc over on long high anhyzers. If you've got the launch to make it cruise, the D.R.A.F.T.™ system will lead you straight down the fairway for accurate distance with a subtle low speed return. Dial in the right grip position to match your style and you'll see why the Velocity™ name speaks for itself.

Legacy™ Multi-Purpose Midrange

CHING® Legacy™ All Around Golf Disc is a retro-traditional 'smooth top' model that satisfies a range of stability demands with renowned control and respectable glide. This model has been retooled for less hi-speed turn (straighter flight) compared to the Oracle™. An excellent multi-purpose golf disc for anyone that just can't seem to find their 'groove' using advanced D.R.A.F.T.™ technology.

Oracle™ Multi-Purpose Midrange

CHING® Oracle™ midrange offers consistent grip with deep Excelerators™ in a unique 3-point pattern. Controllable flights with modest return make this a favorite for moderate arm-speeds. When overclocked it's easier to turnover compared to Legacy™, but doesn't go squirrely if it's sent clean; makes this a useful tactical tool for tight courses.

Precision™ Multi-Purpose Midrange

CHING® Precision™ is a moderate arm-speed, stable, midrange flyer that surprises skeptics with range and finesse. Features our original 9-point Excelerator™ pattern (5 mirrored pod positions + 'open' position) that makes it easy to learn grip consistency and develop power.

Juju™ Putt & Approach

CHING® JUJU™ is a short range, accuracy golf disc suitable for putting and approaching. It has a flat sided rim for more target surface contact & friction, and to slow it down for controlled upshots. The flight is designed to be neutral in stability with minimal fade so you'll land flat where you aim. The rim depth is similar to typical putter profiles, but is comfortably enhanced by the Excelerators™. Perfectly balanced for target distances up to 200'.
